Issues Count	1

Metric	Values
README Presence	✓
License Presence	X
Documentation Presence	X
Examples Presence	✓
Tests Presence	✓
Description Presence	X

Repository Structure:

- Compliance: The repository structure is relatively simple, with a standard layout for code, data, and documentation. It includes a .github directory for issue templates and contribution guidelines.
- Missing files: LICENSE
- Organization: The project appears reasonably organized, separating data into the 'dados' directory and providing an example script. However, the lack of clear documentation beyond the README and GitHub issue templates is a concern.

README Analysis:

- Quality: Minimal. The README file contains only the project title.
- Project description: No
- Installation: No
- Usage examples: No
- Contribution guidelines: Partial
- License specified: No
- Badges present: No

Documentation:

- Tests present: Yes
- Documentation quality: Minimal. Documentation is limited to issue templates and a contribution guide within the .github directory.
- Outdated content: No

Key Shortcomings:

- Lack of project description in README
- Missing LICENSE file
- Insufficient documentation regarding installation, usage, and contributions

Recommendations:

- Add a comprehensive README with a clear project description, installation instructions, and usage examples.
- Include a LICENSE file to specify the terms of use for the code.
- Expand documentation beyond issue templates to provide more detailed guidance on contributing to the project.
